ZAP'T'BALL
The Advanced Edition

a game with encredible new ideas and a variegation in playing. Hunt for Dr. Morlock and fight a war against his hardwaresprites in the CPC Plus Models. Save all Terminals on Earth from being destroyed by him, because the 'older' CPCs are victims too!! Be aware of the canons that through a lot of snow , the snowfalls, this countless big balls and of course the timelimit; this makes the game very interesting and tensional. Over 450KB of packed Files on the Disk with more than 80 Levels must by solved by Ramses and Columbus to in the end win over Dr. Morlock. A lot CRTC-tricks, modern screenspliting techniques, parallexscrolling, vectorgraphics and much more... will amaze you for this game, which is not comparable with other games.

This game is playable on all kinds of CPC; but it didn't works on the new Plus machines. You need a minimum RAM of 128K. (compatible with dk'tronics and Dobbertin ramcards)
